VISTA-MESH™ SECURITY FENCING

7625

More affordable than the 7612 flagship, but still highly secure, the small aperture makes it difficult to climb the 7625.

An aesthetically pleasing modern fence style, this fence panel is also ideal fencing for commercial and residential properties.

Can be installed in conjunction with electric fencing and compatible with our Razor Spikes for ultimate security

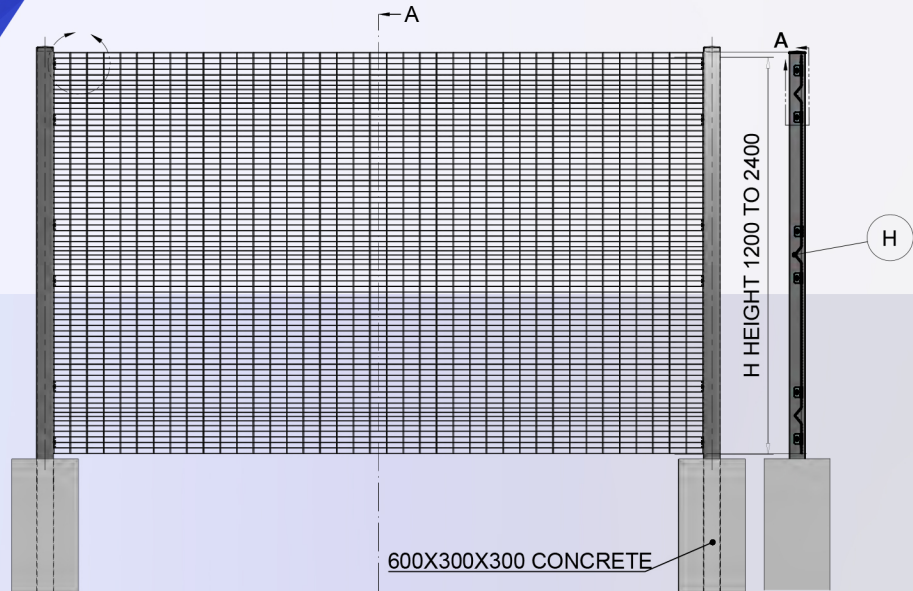

Available either as Pre-Galvanized, Hot Dip Galvanized or Plastic Coated in our fully automated fluidized bed facility, using imported **PLASCOAT®** thermoplastic powder for a long lasting, consistent quality, corrosion resistant, colour finish.

Galvanized

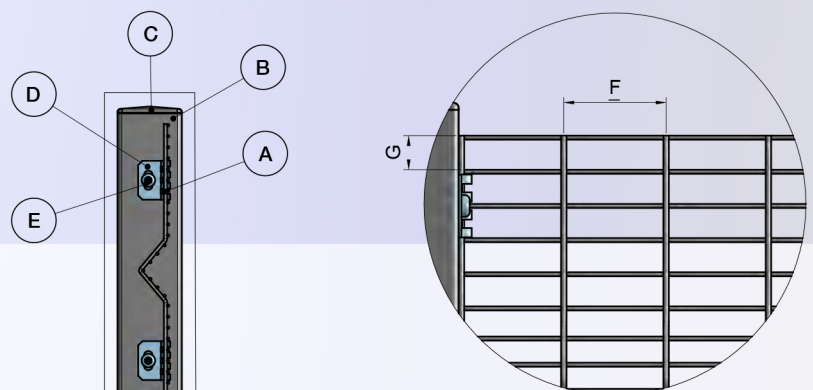

Green - RAL 6005

Anthracite - RAL 7016

Black - RAL 9005

- A 7625 Vista-Mesh Panel
- B Fence Post (see post options sheet)
- C Post Cap
